

A & A GAME ENGINEERING PRODUCT SUPPORT

Product Support sheets come in the following types:

- Clarifications – these are more general clarifications about game play in response to questions from players.
- Corrections and Amendments – these include corrections to errors in game data, typing errors, and mistakes in game play that have come to light. These may come in two alternatives:
 - applicable to the most recent edition.
 - applicable to previous editions. These items will all have been incorporated into the latest edition on sale.
- New Rules – These rules will have been developed in response to requests from players. They may also have been developed from House Rules (see below).
- House Rules and player suggestions. House rules that are tested and work well may be incorporated into the basic rules if the author(s) approve.

OFFICER'S HANDBOOK

UPDATED NATIONAL DATA TABLE

GREAT BRITAIN AND COMMONWEALTH

DATE: 15TH NOVEMBER 2017

What is in this document ?

3 has been corrected to (3:35).

This document contains an updated list of vehicles.

New entries can be identified by a thicker left-hand table margin.

Modified entries have a thicker right-hand table margin and the bottom margins of cells in the table where there has been a change is also thicker.

Some of the vehicles that have been added are because we have them in our collections and have overlooked them while doing the original work.

Other vehicles have had their data altered where we have been able to get more technical specifications of the originals. This is particularly the case of wheeled self-propelled weapons.

Details of the vehicles concerned are summarised below, including in some cases relevant remarks.

- The entries for the Crusader I CS and Crusader II CS are incorrect. Both should show the Hull weapon as being an MGT (2:35), the correct points values being 101 and 100 respectively.

In addition there should also be the option of the vehicles without the sub-turret in the hull (cf. the listing for the standard tanks on page 66). The costs in this case are 91 and 89 points respectively.
 - We have added the Morris CS9/LAC Armoured Car, which was used both in France and North Africa.
 - In the Self-propelled Anti-tank Guns section the speeds and costs of the 2pdr, 25mm and 6pdr portees have been updated.
 - The Bofors and Oerlikon SPAA vehicles should have the annotation 'CV'.
 - We have added the Scotti SPAA vehicle as the British made use of these captured weapons in North Africa.
 - The speed and cost entries for the LRDG Chevrolets have been updated; in addition the FPF data for the 0.5-in HMG in Option
-
