2nd Edition

Maritime and ASW Aircraft Data Booklet

A and A Game Engineering

Terms and Conditions

This product is made available for your personal use only.

The data in this booklet is intended to be transferred by the player to game record sheets, for use when playing a wargame using the Stations Manned and Ready 2nd Edition Rules.

Visit our website for additional information, Clarifications and FAQs on all our products, as well as supporting material and useful links. We hope that you enjoy using this product, and by recommending it to fellow wargamers you will support our further development of rules.

If you have any questions regarding the rules or other products, contact us via the links on the website, or through the email address shown below.

STATIONS MANNED AND READY

MARITIME PATROL AND ASW AIRCRAFT BOOKLET

BY ANDREW FINCH AND ALAN BUTLER

EDITION 2.0

First Edition published by A&AGE 2013

Second Edition published by A&AGE 2015

All parts of this publication are Copyright © 2013, 2015 A&AGE

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form, or by any means, electronic, mechanical, photocopying, record or otherwise whatsoever, without the prior permission of the publisher and authors.

Introductory remark to Edition 2.0

This edition has been introduced because of a few changes in the data. There are a few new aircraft, added at the request of users. The Anti-Submarine aircraft now have a cost attached to the weapons. Finally, the costs for all aircraft have been revised so that the Crew Quality now has an effect on the total cost of the aircraft. The previous calculation did not, and this anomaly came to light while we were processing other data for use with our rules.

How to Use this booklet

The information presented in this booklet is laid out in alphabetical order by Nation.

In each nation, the data is subdivided according to the role of the aircraft, and then the aircraft themselves are listed in alphabetical order of manufacturer.

Aircraft Roles:

The aircraft roles shown in this booklet appear in the following order.

- Floatplane
- Flying Boat
- Reconnaissance, Patrol and Other
- ASW

Aircraft data

Individual aircraft types may come with a variety of different attacks within one role. In this case they are grouped together. Aircraft that have multiple entries show a code letter on the far left in italics. It may be that the other roles appear elsewhere in the data tables.

As this is an extract booklet, you will not necessarily find all the variants.

Each set of data is laid out from the left as follows:

- The variant code
- The date band in which the aircraft was in service.
- The aircraft hit points
- The game speed
- The aircraft defence value when loaded (DVL), or clean, after the aircraft has expended all its payload, (DVC).
- The Air Combat factors (ACF) are then shown. An ACF with a value of 0 can be used in combat. If the ACF is shown as “-” it is not available.

ACF – I shows the Intercept factor and is only available to fighters.

ACF – D1 shows the factor for Dogfight 1 which is used by fighters and also by a fighter-bomber after it has released all its payload.

ACF – D2 shows the factor for Dogfight 2 which is used by loaded fighter-bombers and all other aircraft.

ACF – S shows the Strafing factor which can be used once against a small ship target (type “X”) after which the aircraft must return to base to reload. When the strafing factor has been used the aircraft cannot use an Intercept or Dogfight 1 ACF (both pf which become “-”). If it has a Dogfight 2 value this can be used if in combat with another aircraft.

ACF – A/S shows the anti-shiping gun ACF which can be used once against an unarmoured ship target of types “A%”, “C%” or “X”.

- Payload follows. This shows any attacks that the aircraft can make against a ship or other surface target (usually an air base). The attack type is shown along with any “to hit” modifier, the IP, CV and PEN of the attack where appropriate.

If there are multiple attacks, then the entry starts with ‘n x’.

ASW attacks also show a saving throw modifier for the submarine, and the number of factors (attack dice).

Some aircraft may carry several attacks, each of which appears in a separate row.

- Finally the cost of a single aircraft appears, shown for each of the Crew Quality types. The rules only allow for air crew of quality A to D, but if you wish to make them worse (E) you can.
